Alias

Dar un alias a un campo seleccionado

```
USE sample;
SELECT dept_no AS deptId
FROM department
```

Podemos visualizar dos veces un mismo campo, dandole un alias diferente a cada uno

```
USE sample;
SELECT dept_no AS deptId, dept_no AS dept_Id
FROM department
```

Requiere comillas dobles o corchetes si el nombre del alias contiene espacios

```
USE sample;

SELECT dept_no AS "dept Id"
FROM department

SELECT dept_no AS [dept Id]
FROM department
```

Podemos generar un alias sin necesidad de utilizar el comando "AS"

```
USE sample;

SELECT dept_no dept_Id
FROM department

SELECT dept_no "dept Id"
FROM department

SELECT dept_no [dept Id]
FROM department
```
